

I claim:

1. A flexible carry bag with fluid bladder comprising:

a carry bag generally oval in longitudinal cross section formed from two complimentary panels secured about a portion of said panels peripheries, thereby defining an opening proximate one end thereof and a cavity;

a fluid bladder for containment of a fluid, generally oval in longitudinal cross section formed from two complimentary panels secured about said panels peripheries and defining an opening at one end thereof, said opening having a closure means formed thereon for the filling of said fluid bladder and dispensing from said fluid bladder, said fluid bladder shape being complimentary with said cavity of said carry bag;

a closure means secured to said carry bag for partial closure of said opening of said carry bag, said closure permitting the insertion and removal of said fluid bladder, said closure means of said fluid bladder extending outwardly from said carry bag when said closure means of said carry bag is in a closed position.

2. The flexible carry bag with fluid bladder in accordance with Claim 1 wherein said carry bag and said fluid bladder are kidney-shaped.

3. The flexible carry bag and fluid bladder in accordance with Claim 1 wherein said closure means of said carry bag is a flap permanently secured to one of said panels of said carry bag and secured to said opposing panel by a hook and loop fastener means.

4. A flexible carry bag with fluid bladder in accordance with Claim 1 wherein said closure means of said carry bag is a zipper securing opposing panels of said carry bag.

5. A flexible carry bag with fluid bladder in accordance with Claim 1 wherein said fluid bladder is formed of polyethylene.

6. The flexible carry bag with fluid bladder in accordance with Claim 1 wherein said closure means of said fluid bladder is a threaded closure.

7. The flexible carry bag with fluid bladder in accordance with Claim 1 wherein said fluid bladder is disposable.

8. The flexible carry bag with fluid bladder in accordance with Claim 1 wherein said fluid bladder is reusable.
